

Side Effects of the Celebrex Medicine

Side Effects of Celebrex - Medicine Uses, Doseage, and Warnings

Celbrex 100mg and 200mg capsules

Consumer Prescription Medicine & Contraindication Information

Side effects - Check with your doctor as soon as possible if you have any problems while taking Celebrex , even if you do not think the problems are connected with the medicine or are not listed in this information. Like other medicines, Celebrex can cause some side effects. If they occur, most are likely to be minor and temporary.

stomach pain; diarrhea, indigestion, wind, swollen hands, ankles and feet, dizziness, sore throat, runny nose, sinusitis, upper respiratory tract infection, and rash

What Celebrex is used for? Celebrex is used to treat joint pain, tenderness, swelling and stiffness; in osteoarthritis; and in rheumatoid arthritis.

Celebrex is also used to relieve short-term pain, in cases such as: menstrual cramps (period pain); following surgery; dental pain.

Celebrex belongs to a group of medicines called Coxibs. Celebrex is used to relieve the pain and inflammation associated with arthritis.

Although Celebrex can relieve the symptoms of pain and inflammation, it will not cure your condition. Your doctor, however, may have prescribed Celebrex for another purpose.
